

Pranav Kulkarni

Frontend Developer

Hi, I'm Pranav! I am a full stack developer. I started my journey in development 3 years ago and since then I have built applications in JAVA and am currently building websites in HTML/JavaScript/CSS using Angular CLI. My approach to programming and life in general is "process over result". I am open to learning in start-up environments and would also love to experience corporate culture. I believe communication is key and my openness to learn new technologies gives me a bird's eye view.

PERSONAL PROJECTS/ FREELANCING

FrontEnd Engine

Co-founder

12/2022 - Present

Toronto, Canada

It is a front-end development firm that I developed using the Angular CLI. The website offers a wide range of services, including mobile application creation, technical supervision on a contract basis, and webpage construction. Links to all of my projects are available on my GitHub.

Achievements/Tasks

- Typescript, Angular, HTML, CSS

JAVA Tutoring

FrontEnd Engine (Major Service)

12/2022 - Present

Toronto, Canada

As I understand how to code in Java better. To pupils who are interested in coding, I teach Java. I instruct students in Java from beginner to expert levels on topics like inheritance, polymorphism, and others. I advertise on my website FrontEnd Engine and charge \$50 each session. Links to all of my projects are available on my GitHub.

Achievements/Tasks

- JAVA

SaveTech

Android App Development

12/2021 - 04/2022

Toronto, Canada

It's a Java-coded Android app created in Android Studios. To assist students in saving money for whatever they desire to purchase, this savings app was developed. Links to all of my projects are available on my GitHub.

Achievements/Tasks

- JAVA, Android Studios

SKILLS

JAVA

Python

Angular CLI

HTML
