Driven by Javascript & currently working in Performance Team @ NTT Data. Previously wrote reusable components for AA's design system. I've worked in a fast-paced start-up environment & experienced corporate culture as well. Immense care for responsive designs & user experience, made of "Process Over Result" approach. Believe communication is the key to every successful project delivered. I like to write code for humans, learning compassionate coding everyday.

## WORK EXPERIENCE

### SDE Specialist (Angular) - Performance NTT Data

07/2020 - Present

Dallas

#### Achievements/Tasks

- Review poorly implemented code, find possible solutions. Monitor first paint, largest paint & render-blocking third-party scripts. Lighthouse monitoring.
- Introduce caching techniques via local storage of key scripts & assets.
- Using trackBy for \*ngFors, splitting bundles, gzipping & looking for all kinds of performance improvements in multiple code bases, look for common problems and create reusable components.

### Sr Frontend Developer (Design Systems) American Airlines

11/2018 - Present

Dallas/Fort-Worth

A part of Platform team at American Airlines HQ.

#### Job Responsibilities

- I write code for developers working in the delivery teams. My job is to make their job easier.
- Our team's goal is to promote a consistent look and feel while increasing productivity and setting standards for Angular based applications.
- Written schematics to generate American standardized forms and templates for our developers to consume.
- Maintain Design System / Core SCSS library consumed by internal AA teams.

### Sr Front End Developer (Remote) Motivity Labs

10/2015 - 10/2018

Dallas/Fort-Worth

Worked on several projects over the span of 3 years. Following are the projects which helped me improve as a developer & become a solid team player.

#### Project - Job responsibilities

- Tridot - Dashboard redesign of the entire portal, working closely with the designer and backend developer to create a functional product.
- Verizon - Refactoring VISE application to coding standards of Angular JS. Brought in as an Angular JS Architect.
- Tech Stack - Angular 5, RxJS, Ionic, Angular JS.

### Fullstack Developer Ajactus

06/2012 - 12/2013

Mumbai

#### Achievements/Tasks

- Full stack developer working fulltime in wordpress.

## SKILLS

Javascript

Angular

Schematics

RxJS

IPFS

SCSS

Ionic

TypeScript

Design Systems

HTML

CSS

## PROJECTS

### hrishi.live

- On going effort to move entire site to Inter planetary file system, pulling assets & scripts from IPFS
- End goal - make entire website truly decentralized

### bananaproject.org - owner (02/2021 - Present)

- Introducing UX into nutrition through the science of gut health.
- Keeping current events into consideration the banana project aspires to be the center point of digestion first health movement.
- Easy workout techniques & nutritional guidelines to implement for everyone inspired by coding principles & backtracking good practices and debugging.
- Injecting awareness & understanding health stocks through plant-based whole foods lens.

### lyra-influence.com - principal frontend developer (10/2017 - Present)

- Activity Dashboard for Companies to Monitor Social Influence of Instagram/Twitter Influencers.
- Built a live chat that call center employees use to communicate with chasers. Chasers can send pictures of the damage and interact with the call center employee providing them details of the event.

### POC Bus notifications for school - principal frontend developer (06/2017 - 08/2017)

- Teamed up with the senior backend developers from Verizon to help them out with a cross platform mobile UI with Ionic.
- Parents are sent in app notifications/SMS notifications for the bus stops they want on the basis of their settings.
- Fetching application data through REST calls, one time login for the user using their phone number for authentication. Using the best of Ionic & Angular JS to deliver a smooth application and excellent experience for the users. Using Material CSS & Bulma for CSS Framework.

## EDUCATION

### MS in Computer Science University of Texas at Arlington

01/2014 - 12/2015
